

Langry LR-G100 Rebar Scanner

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Langry LR-G100 Rebar Scanner

Manufacturer: Langry

Model: NDT-LAN-02010

Availability: In Stock

Description

The rebar detector is a portable intelligent non-destructive testing device, primarily used for structural inspection of reinforced concrete. It accurately detects rebar cover thickness on the surface of reinforced concrete and analyzes rebar distribution. It can also detect the orientation and distribution of ferromagnetic materials and conductors in non-ferromagnetic media. User-friendly LCD screen. Intelligent software analysis for efficient data interpretation. High-precision sensors to ensure accurate results. Stylish appearance with ergonomic design for easier long-term use. Equipped with a touch-enabled full-color LCD screen for clear and easy interaction with the user interface...
