

Langry RH225-B Digital Concrete Test Hammer

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Langry RH225-B Digital Concrete Test Hammer

Manufacturer: Langry

Model: NDT-LAN-02011

Availability: In Stock

Description

The RH225-B Digital Rebound Hammer, meticulously developed by Langry Technology, is a practical patented product that fully complies with national regulations. The sensor part of the rebound hammer has undergone revolutionary structural innovation, adopting a non-contact electromagnetic sensor. This greatly solves the accuracy of rebound data affected by various factors such as strong light and dust with traditional sensors, as well as the frequent maintenance issues of the rebound hammer, thereby improving the accuracy of testing and the service life of the rebound hammer. Utilizes electromagnetic sensor technology, free of load and contact, ensuring zero interference with rebound values...
