

Langry LR-G300 Integrated Rebar Scanner

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Langry LR-G300 Integrated Rebar Scanner

Manufacturer: Langry

Model: NDT-LAN-02028

Availability: In Stock

Description

The LANGRY LR-G300 integrated rebar scanner is designed for accurate detection of rebar position, distribution, and thickness of concrete cover in reinforced concrete structures. Our software facilitates easy data import, management, analysis, and graphical representation, ensuring efficient project monitoring. With features like multi-stop correction, optimized rebar judgment algorithm, and upgraded laser positioning, it offers unparalleled user-friendly operation and precise detection results. Trust LANGRY for superior quality and reliability in rebar scanning technology. Supports wireless connection with mobile phones, enabling real-time online testing and uploading of testing data to ...
