Description

LANGRY's Testing Anvil GZIII/GZIV is crafted for accuracy from top-grade materials, ensuring reliable calibration. Elevate your testing standards today for unparalleled results. Versatile compatibility with various rebound hammers devices. Precise calibration capabilities for consistent results. Durable construction for long-term use. The guide cylinder adopts the latest structure, and the rebound instrument automatically guides the process when pressed without manual adjustment. The weight of the steel anvil of the guide cylinder meets the regulations' requirements whether it is disassembled or not. The Steel anvil body and tools are made of high-quality steel, which is durable, sta...
