Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

## Product Overview

### Langry FT90 Floorslab Thickness Tester

**Manufacturer:** Langry

**Model:** NDT-LAN-03494

**Availability:** In Stock

## Description

The LANGRY FT90 floor thickness tester is a portable instrument that uses electromagnetic non-destructive testing technology to measure the thickness of concrete and other non-ferromagnetic media. The instrument adopts a split structure, and the host and receiving probe communicate in Bluetooth mode, which is convenient for on-site testing. It has the advantages of simple operation, wide measurement range, and small measurement error. The most outstanding function of the instrument is that the host receiving probe can automatically find the position of the transmitting probe within the effective range of signal reception and lock the center, which greatly saves the measurement time. Dual...
