

Langry LR-P10 Pull-off Tester

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Langry LR-P10 Pull-off Tester

Manufacturer: Langry

Model: NDT-LAN-03496

Availability: In Stock

Description

The tester adopts a mechanical and electrical integration design, with the entire set of instruments forming a single unit. It consists of a handle, sensor, screw, reaction support, and other mechanical parts, forming a “gate” structure. The measurement display circuit is embedded in the instrument for direct data observation. The tester features light weight, easy handling, and convenient operation. The intelligent high-precision carbon fiber bonding strength tester is another new type of testing instrument developed by Langry. It is suitable for testing the tensile bonding strength between carbon fiber sheets and concrete in civil engineering structures. It is an ideal testing device for ...
