

Potassium Dichromate (reagent Grade)

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Potassium Dichromate (reagent Grade)

Manufacturer: Hira
Model: MAT-HIR-03715
Availability: In Stock

Description

Potassium dichromate (reagent grade) is an orange-red crystalline solid, typically ACS grade at high purity. It is a potent oxidizing agent used in redox titrations, COD/soil-oxidation testing, and chromic-acid cleaning solutions.
