

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Average Least Dimension Gauge

Manufacturer: Hira

Model: MAT-HIR-03757

Availability: In Stock

Description

This gauge is a heavy-gauge sheet-steel plate fitted with seven parallel-sided elongated slots of progressively decreasing width, built to the dimensions set out in BS 812. Coarse aggregate is separated into its standard sieve fractions and each fraction is tried against its matching slot; any particle that passes through is one whose least dimension falls below 0.6 of its nominal size, giving the average least dimension index used to judge particle shape.
