

Soil Permeability Apparatus

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Soil Permeability Apparatus

Manufacturer: Hira

Model: MAT-HIR-03851

Availability: In Stock

Description

This is a falling-head permeameter for measuring hydraulic conductivity of fine-grained soils such as clays and silts, using manometer tubing to track how fast the water level drops through a saturated sample, to BS 1377-5/ASTM D2434/AASHTO T215.
