

TIAN Still for producing distilled water

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

TIAN Still for producing distilled water

Manufacturer: TIAN

Model: MAT-TIA-1006810

Availability: In Stock

Description

This is a laboratory still that boils tap water and condenses the vapour to yield distilled water for reagent preparation and equipment rinsing, avoiding metallic leaching for chemically pure distillate.
